

**Web 2.0 Learning Opportunity**

**Venue:** Center for Virtual Learning Lab (Yombo Lab), College of Information and Communication Technologies (CoICT), University of Dar Es Salaam (UDSM), Tanzania.

**Date and time:** Monday 27 June – Friday 1 July 2011 (8:30 – 16:30)

Technological innovation is taking place at a breath-taking pace. Simple, open source internet-based applications and services designed to enhance on-line collaboration are now available to the wider public at little or no cost at all. These new online technologies known as Web 2.0 applications - sometimes called 'social media' - enable people to collaborate to create, share and publish information.

The **Technical Centre for Agricultural and Rural Cooperation EU-ACP** ( [CTA](#) ) has a mandate to facilitate access to and dissemination of information in the fields of agriculture and rural development in 78 countries in Africa, the Caribbean and the Pacific (ACP). Supporting the adoption of Web 2.0 applications represents a great opportunity for meeting it.

The **University of Dar Es Salaam** ( [UDSM](#) ), in collaboration with CTA will host one 5-day Web 2.0 Learning Opportunity starting on Monday 27 June 2011. Participants will be introduced to selected web 2.0 applications and will learn how to use them hands-on. The Learning Opportunity will cover advanced online searching, getting information served via alerts and RSS, collaborating remotely using wikis and Google Docs, using VoIP, online mapping and social networking. Participants will get a chance to see what others have done, get hands-on experience on how to use innovative applications, and assess how they could adopt these innovations within the context of their work and organisation. These Learning Opportunities form part of CTA initiatives that support development partners in networking, accessing and disseminating information more effectively.

### **Programme of the Learning Opportunity**

- Introduction to the participatory World Wide Web (Web 2.0)
- Search Magic: How to conduct advanced multilingual online searches;
- Information Self Service: How to get selected information served to you via alerts and RSS feeds;

- Remote collaboration: How to develop content remotely using wikis and Google Docs;
- Online mapping: How to locate your organisation and your projects on a online Map;
- How to communicate voice over the internet at no cost;
- Online publishing (micro-blogging and blogging);
- Professional / corporate social networking (LinkedIn and Facebook);
- Web 2.0 self-instruction (introduction to iMARK)
